lidya

“Lidya’s classic design brings everything that is expected of an executive furniture collection.”

We intended to create the furniture for executive offices that would impress and carry the stamp of power. We also wanted our design to remain available and suitable for practical production. It must be flexible for personal customized combinations and have a wide range of colors to appeal to every taste. We brought these ideas together and produced Lidya.

There are certain aspects that you need to envision if you are designing furniture for executives. This furniture must be functional and appealing, harmoniously blending with office decor and most certainly have a prestigious look. We believe Lidya has embodied the classic design lines and high expectations of executive furniture.

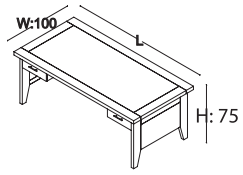

Sacit Arisev

The design and functionality of Lidya series boost productivity and efficiency in the office. Combination of leather and wood for on tabletops, cabinets and side tables brings clarity and elegant simplicity to your office.

beta

“multi functional panel systems create private work spaces.”

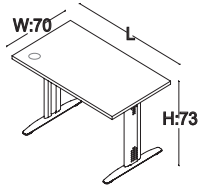

Unlike executive furniture, the frequency of use is high we have designed a robust, functional and simple look for crowded work areas. We have enabled the creation of personal workspaces with electrification solutions, panel systems that can be used in different ways, which provide ease of use and convenience to employees.

We created an aesthetic perception with its simple design. Besides all these features, Beta is the ideal solution for employees with different tray and color options.

zeta

design focused on functionality...

Cümlesi yerine, Zeta is a functional desk designed with minimal lines, gaining you truly efficient workspace. It makes difference with its elegant and powerful look. The tabletop features partial or complete combinations with side unit applications.

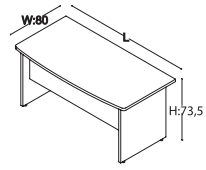

Zeta brings minimal solutions to operational areas with its mountable meeting module and fraction-assisted etajer table.

As the savior of multiple workspaces, Zeta creates private office space for you even in crowded work environments.

levels

“perfectly blending wood with leather,
Levels allows managers to easily focus on
the meeting.”

I designed this product for strong leaders and managers; Focusing around a topic, opinion or presentation, it provides a comfortable and convenient work environment. The relationship between the components visually and functionally provides diversity in the product to meet different dimensions and needs.

The combination of thick and thin legs not only provides the necessary data and electrification details, but also allows the combination of the naturalness of the wood and the leather material in different color alternatives. Foot and measure differences in the pieces I use the tabletop creates a natural balance among themselves. The level differences between surfaces refer to the “Levels concept” which I set as the starting point in the design of the product.

Arif Akıllılar

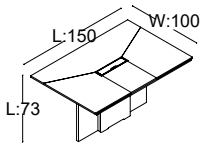

The simplicity in the appearance of Levels leaves your focus on the agenda of the meeting without distractions.

concave

Concave lines are the characteristic feature of 'Concave'. The Concave sofas are leftely focusing on comfort and compel their users to sit comfortably.

Concave is available as one, two, or three seater sofas with wide range of colors. With Concave, it is possible to create a peaceful corner in every office.

hare

When I was designing Hare, I wanted it to be the mark of simplicity and elegance. I succeeded this task by using powerful geometric lines. While Hare's rigid forms contribute to the prestige of your office, its cubic lines build a comfortable sitting area.

This sofa is the perfect choice for the new generation offices, its one, two or three seater options bring people together. Hare is aesthetic and minimalist furniture that is impossible not to miss.

M. Erdi Özgürlük

efes

Efes's elegant design builds beautiful and strong image. The cubic lines convey powerful appearance, highlighted with high quality material and comfort.

biga

Biga, with its minimalist lines and single and double alternatives is what you are looking for in a modern office. The two-color combinations of the design carry dynamism and freshness to your offices.

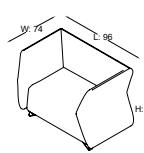

side

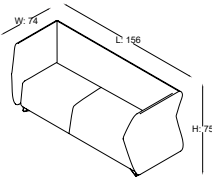

With its lean appearance, Side gives the office a warm look with its wooden leg detail. Single and dual session options are available.

shelf

“shelf changes the notion of waiting”

Shelf waiting unit has a simple design. Its clean and open form underlines the relationship between the product and its user, providing care and comfort. In the design process, our priority was to create an elegant addition to the office space with seamless fit to decor. Giving body to these ideas, Shelf become flexible product changing its shape according to the size of the room or number of the users.

With its comfortable seats and combined side tables, Shelf promises a relaxed waiting time. The flexible arrangements of waiting modules enable to large form sitting surfaces.

Efficiency and cost-effectiveness of the product within the cycle of production, use and storage were important design criteria. We developed innovative, user and environment friendly product with applied fast and economic serial manufacturing. At airports, fairs, hotels, shopping malls and at the lobbies of all types of companies, thanks to Shelf, waiting becomes pleasure.

Umut Sevinç

fluid

“fluid and spacious...”

The starting point of Fluid design was to create “fluid and spacious”, river-like waiting areas. My priority was to make comfortable and enjoyable waiting spaces in high circulation areas. With practical structure, flexible arrangement and functionality, Fluid is a successful accomplishment of this mission.

The modular structure and various arrangement possibilities of Fluid transform chaotic places into spacious areas with a simple touch. In line with my other designs, I wanted to create a non-problematic, functional, and at the same time attractive product. The worldwide marketing of the product was an important motivation factor for me. As a result, the surprising, practical and customized Fluid was born.

Ertunç Öner

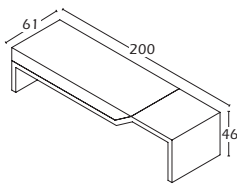

Single or double-sided seat choices...

The modern lines of Fluid create a colorful and elegant atmosphere in waiting areas. The modules can be added to one another, and various sitting arrangements can be formed.

mobile and high pedestals

“pedestals are invisible heroes of offices!”

The secret of having a spacious office is hidden in the small details. On castors, high, table side, suspended and movable, they are invisible heroes in charge of tidy office. They are designed to help workers to find what they are looking for in their smart drawers.

You can choose a different pedestal type according to your need, manufactured from high quality materials they are strong and durable. Units designed to offer practical leftutions as well as to provide the visual continuity between the rest of the furniture.
